Securities registered pursuant to Section 12(g) of the Act: None.

Indicate by check mark if the registrant is a well-known seasoned issuer as defined in Rule 405 of the Securities Act. Yes ☒ No ☐

Indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or Section 15(d) of the Act. Yes ☐ No ☒

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes ☒ No ☐

Indicate by check mark whether the registrant has submitted electronically every Interactive Data File required to be submitted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit such files). Yes ☒ No ☐

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, a smaller reporting company, or an emerging growth company. See the definitions of "large accelerated filer," "accelerated filer," "smaller reporting company" and "emerging growth company" in Rule 12b-2 of the Exchange Act.

Large accelerated filer ☒

Non-accelerated filer ☐

Accelerated filer ☐

Smaller reporting company ☐

Emerging growth company ☐

If an emerging growth company, indicate by check mark if the registrant has elected not to use the extended transition period for complying with any new or revised financial accounting standards provided pursuant to Section 13(a) of the Exchange Act. ☐

Indicate by check mark whether the registrant has filed a report on and attestation to its management's assessment of the effectiveness of its internal control over financial reporting under Section 404(b) of the Sarbanes-Oxley Act (15 U.S.C. 7262(b)) by the registered public accounting firm that prepared or issued its audit report. ☒

Indicate by check mark whether the registrant is a shell company (as defined in Exchange Act Rule 12b-2). Yes ☐ No ☒

The aggregate market value of the voting stock held by non-affiliates of the registrant as of the last business day of the registrant's most recently completed second fiscal quarter was \$107.5 billion.

The registrant had 893,594,090 shares of common stock outstanding at February 10, 2021.

PART I

Item 1. Business:

International Business Machines Corporation (IBM or the company) was incorporated in the State of New York on June 16, 1911, as the Computing-Tabulating-Recording Co. (C-T-R), a consolidation of the Computing Scale Co. of America, the Tabulating Machine Co. and The International Time Recording Co. of New York. Since that time, IBM has focused on the intersection of business insight and technological innovation, and its operations and aims have been international in nature. This was signaled almost 100 years ago, in 1924, when C-T-R changed its name to International Business Machines Corporation. And it continues today—we create value for clients by providing integrated solutions and products that leverage: data, information technology, deep expertise in industries and business processes, with trust and security and a broad ecosystem of partners and alliances. Our hybrid cloud platform and AI technology and services capabilities support clients' digital transformations and help them engage with their customers and employees in new ways. These solutions draw from an industry-leading portfolio of consulting and IT implementation services, cloud, digital and cognitive offerings, and enterprise systems and software which are all bolstered by one of the world's leading research organizations.

The following information is included in IBM's 2020 Annual Report to Stockholders and is incorporated by reference:

IBM Strategy—pages 23 to 25.

Business Segments and Capabilities—pages 25 to 28.

IBM Worldwide Organizations—page 28.

Human Capital—page 29.

Competition

IBM is a globally integrated enterprise that participates in a highly competitive environment, where our competitors vary by industry segment, and range from large multinational enterprises to smaller, more narrowly focused entities. Overall, across our business segments, we recognize hundreds of competitors worldwide.

Our principal methods of competition are: technology innovation; performance; price; quality; brand; our broad range of capabilities, products and services; talent; client relationships and trust; the ability to deliver business value to clients; and service and support. In order to maintain leadership, we must continue to invest, innovate and integrate. We are redefining our future as a hybrid cloud and AI company and have been making investments, both organic and inorganic, as well as shifting resources, embedding AI and cloud into our offerings while building new solutions and modernizing our existing platforms. These investments not only drive current performance, but will extend our innovation leadership into the future. Our key differentiators are built around three pillars—innovative technology, industry expertise and trust and security, uniquely delivered through an integrated model. As we execute our strategy as a hybrid cloud and AI company, deploy new delivery and go-to-market models and expand our ecosystem, we are regularly exposed to new competitors. Overall, the company is the leader or among the leaders in each of our business segments.

A summary of the competitive environment for each business segment is included below:

Cloud & Cognitive Software:

The depth and breadth of our software offerings, coupled with our global markets, deep industry expertise and technical support infrastructure help differentiate our offerings from our competitors. IBM's research and development capabilities and IP patent portfolio also contribute to differentiation. We have built a hybrid cloud platform based on open technologies that allows clients to realize their digital and AI transformations across the applications, data and

environments in which they operate. The principal competitors in this segment include Alphabet Inc. (Google), Amazon.com, Inc. (Amazon), BMC, Broadcom, Cisco Systems, Inc. (Cisco), FireEye, Microsoft Corporation (Microsoft), Oracle Corporation (Oracle), Salesforce, SAP, Splunk and VMware. We also compete with smaller, niche competitors in specific geographic or product markets.

Global Business Services:

GBS competes in consulting, systems integration, application management and business process outsourcing services. We compete with broad-based competitors including: Accenture, Capgemini, DXC Technology (DXC), Fujitsu; cloud services providers; India-based service providers; the consulting practices of public accounting firms; and many companies that primarily focus on local markets or niche service areas.

Global Technology Services:

GTS competes in project, managed and outsourcing services, cloud-delivered services, and technical and IT support services. The market contains a diverse set of competitors, with GTS the share leader. In Infrastructure & Cloud Services, our competitors include: Atos, DXC, Fujitsu, HCL, Infosys, Tata Consulting Services, Wipro and many companies that primarily focus on local markets or niche service areas. We also compete with the ecosystems of cloud platform vendors such as Amazon, Google, Microsoft and Oracle. In Technology Support Services, we compete with several hardware and software vendors who offer support services for their own products, as well as independent support services providers.

Systems:

The enterprise server and storage markets are characterized by competition in technology and service innovation focused on value, function, reliability, price and cost performance and as-a-Service delivery. Our principal competitors include Dell Technologies, Hewlett-Packard Enterprise (HPE), Intel and original device manufacturer systems that are often re-branded. Also, alternative as-a-Service providers are leveraging innovation in technology and service delivery both to compete with traditional providers and to offer new routes to market for server and storage systems. These alternative providers include Amazon, Google, Microsoft, and IBM's own cloud-based services.

We gain advantage and differentiation through investments in higher value capabilities—from semiconductor through software stack innovation—that increase efficiency, lower cost and improve performance. Our research and development capabilities and IP patent portfolio contribute significantly to this segment's leadership across areas as diverse as high-end and high-performance computing, virtualization technologies, software optimization, power management, security and resiliency, multi-operating system capabilities and open technologies like interconnect standards to be leveraged by broad ecosystems.

Global Financing:

Global Financing provides client financing, commercial financing and participates in the remanufacturing and remarketing of used equipment. Global Financing's ability to manage credit and residual value risk generates a competitive advantage for the company. The key competitive factors include interest rates charged, IT product experience, client service, contract flexibility, ease of doing business, global capabilities and residual values. In client and commercial financing, Global Financing primarily competes with non-captive financing entities and financial institutions. In remanufacturing and remarketing, we compete with local and regional brokers plus original manufacturers in the fragmented worldwide used IT equipment market.

Forward-looking and Cautionary Statements

Certain statements contained in this Form 10-K may constitute “forward-looking statements” within the meaning of the Private Securities Litigation Reform Act of 1995 (“Reform Act”). Forward-looking statements are based on the company’s current assumptions regarding future business and financial performance. These statements by their nature address matters that are uncertain to different degrees. The company may also make forward-looking statements in other reports filed with the Securities and Exchange Commission (SEC), in materials delivered to stockholders and in press releases. In addition, the company’s representatives may from time to time make oral forward-looking statements. Forward-looking statements provide current expectations of future events based on certain assumptions and include any statement that does not directly relate to any historical or current fact. Words such as “anticipates,” “believes,” “expects,” “estimates,” “intends,” “plans,” “projects,” and similar expressions, may identify such forward-looking statements. Any forward-looking statement in this Form 10-K speaks only as of the date on which it is made. Except as required by law, the company assumes no obligation to update or revise any forward-looking statements. In accordance with the Reform Act, set forth under Item 1A. “Risk Factors” on pages 4 to 10 are cautionary statements that accompany those forward-looking statements. Readers should carefully review such cautionary statements as they identify certain important factors that could cause actual results to differ materially from those in the forward-looking statements and from historical trends. Those cautionary statements are not exclusive and are in addition to other factors discussed elsewhere in this Form 10-K, in the company’s filings with the SEC or in materials incorporated therein by reference.

The following information is included in IBM’s 2020 Annual Report to Stockholders and is incorporated herein by reference:

Segment information and revenue by classes of similar products or services—pages 91 to 96.

Financial information regarding environmental activities—page 117.

The number of persons employed by the registrant—page 29.

The management discussion overview—pages 19 to 22.

Website information and company reporting—page 142.

Executive Officers of the Registrant (at February 23, 2021):

	<u>Age</u>	<u>Officer since</u>
Arvind Krishna, Chairman of the Board and Chief Executive Officer*	58	2020
Michelle H. Browdy, Senior Vice President, Legal and Regulatory Affairs, and General Counsel	56	2015
Gary D. Cohn, Vice Chairman	60	2021
Robert F. Del Bene, Vice President and Controller	61	2017
Nickle J. LaMoreaux, Senior Vice President and Chief Human Resources Officer	41	2020
James J. Kavanaugh, Senior Vice President and Chief Financial Officer, Finance and Operations	54	2008
James M. Whitehurst, President	53	2020

* Member of the Board of Directors.

All executive officers are elected by the Board of Directors annually as provided in the Company’s By-laws. Each executive officer named above, with the exception of Gary D. Cohn and James M. Whitehurst, has been an executive of IBM or its subsidiaries during the past five years. Mr. Cohn is Co-Chairman of Cohn Robbins Holding Corp, a special-purpose acquisition company. Mr. Cohn previously served as Assistant to the President for Economic Policy and Director of the National Economic Council from January 2017 until April 2018. Before serving in the White House, Mr. Cohn was President and Chief Operating Officer of The Goldman Sachs Group, Inc. from 2006-2016. Mr. Whitehurst served as Chief Executive Officer of Red Hat, Inc., a multinational software company, from 2007 until it was acquired by IBM in 2019.

Item 1A. Risk Factors:

Risks Related to Our Business

Downturn in Economic Environment and Client Spending Budgets Could Impact the Company's Business: If overall demand for IBM's products and solutions decreases, whether due to general economic conditions, including those associated with the COVID-19 pandemic, or a shift in client buying patterns, the company's revenue and profit could be impacted.

Failure of Innovation Initiatives Could Impact the Long-Term Success of the Company: IBM has been moving into areas, including those that incorporate or utilize hybrid cloud, artificial intelligence, blockchain, IoT, quantum and other disruptive technologies, in which it can differentiate itself through responsible innovation, by leveraging its investments in R&D and attracting a successful developer ecosystem. If IBM is unable to continue its cutting-edge innovation in a highly competitive and rapidly evolving environment or is unable to commercialize such innovations, expand and scale them with sufficient speed and versatility or is unable to attract a successful developer ecosystem, the company could fail in its ongoing efforts to maintain and increase its market share and its profit margins.

Damage to IBM's Reputation Could Impact the Company's Business: IBM has one of the strongest brand names in the world, and its brand and overall reputation could be negatively impacted by many factors, including if the company does not continue to be recognized for its industry leading technology and solutions and as a hybrid cloud and AI leader. IBM's reputation is potentially susceptible to damage by events such as significant disputes with clients, product defects, internal control deficiencies, delivery failures, cybersecurity incidents, government investigations or legal proceedings or actions of current or former clients, directors, employees, competitors, vendors, alliance partners or joint venture partners. If the company's brand image is tarnished by negative perceptions, its ability to attract and retain customers, talent and ecosystem partners could be impacted.

Risks from Investing in Growth Opportunities Could Impact the Company's Business: The company continues to invest significantly in key strategic areas to drive revenue growth and market share gains. Client adoption rates and viable economic models are less certain in the high-value, highly competitive, and rapidly-growing segments. Additionally, emerging business and delivery models may unfavorably impact demand and profitability for our other products or services. If the company does not adequately and timely anticipate and respond to changes in customer and market preferences, competitive actions, emerging business models and ecosystems, the client demand for our products or services may decline or IBM's costs may increase.

IBM's Intellectual Property Portfolio May Not Prevent Competitive Offerings, and IBM May Not Be Able to Obtain Necessary Licenses: The company's patents and other intellectual property may not prevent competitors from independently developing products and services similar to or duplicative to the company's, nor can there be any assurance that the resources invested by the company to protect its intellectual property will be sufficient or that the company's intellectual property portfolio will adequately deter misappropriation or improper use of the company's technology. In addition, the company may be the target of aggressive and opportunistic enforcement of patents by third parties, including non-practicing entities. Also, there can be no assurances that IBM will be able to obtain from third parties the licenses it needs in the future. The company's ability to protect its intellectual property could also be impacted by changes to existing laws, legal principles and regulations governing intellectual property, including the ownership and protection of patents.

Certain of the company's offerings incorporate or utilize open source and other third-party software licensed with limited or no warranties, indemnification, or other contractual protections for IBM. Further, if open source code that IBM utilizes is no longer maintained, developed or enhanced by the relevant community of independent open source software programmers, most of whom we do not employ, we may be unable to develop new technologies, adequately enhance our existing technologies or meet customer requirements for innovation, quality and price.

[Table of Contents](#)

The Announced Spin-Off of the Company's Managed Infrastructure Services Unit into a Standalone, Publicly-Traded Company is Contingent upon the Satisfaction of a Number of Conditions, May Not Be Completed on the Currently Contemplated Timeline, or at All, and May Not Achieve the Intended Benefits: On October 8, 2020, the company announced its intention to separate the Managed Infrastructure Services unit of its Global Technology Services segment into a new, independent public company (currently referred to as NewCo). Completion of the announced spin-off, as well as the timing of completion, is subject to the readiness of NewCo to operate as an independent public company, finalization of the financial statements of NewCo, assurance that the separation will be tax-free for U.S. federal income tax purposes, finalization of the capital structure of the company and NewCo, the effectiveness of appropriate filings with the U.S. Securities and Exchange Commission, final approval of the IBM Board of Directors, and other customary items. The announced spin-off is complex in nature and may be affected by unanticipated developments or changes in market conditions. There is the potential for business disruption and, as previously disclosed, the company expects significant separation costs. These or other unanticipated developments or costs could delay or prevent the announced spin-off or cause the announced spin-off to occur on terms or conditions that are less favorable than anticipated. Furthermore, if the spin-off is completed, there is no guarantee that it will be successful in meeting its objectives or achieving its intended benefits. Any of these factors could have a material adverse effect on our business and results of operations.

Risks to the Company from Acquisitions, Alliances and Dispositions Include Integration Challenges, Failure to Achieve Objectives, the Assumption of Liabilities and Higher Debt Levels: The company has made and expects to continue to make acquisitions, alliances and dispositions. Such transactions present significant challenges and risks and there can be no assurances that the company will manage such transactions successfully or that strategic opportunities will be available to the company on acceptable terms or at all. The related risks include the company failing to achieve strategic objectives, including the company's intention to separate the Managed Infrastructure Services unit of its Global Technology Services segment into a new and independent public company, anticipated revenue improvements and cost savings, the failure to retain key strategic relationships of acquired companies, the failure to retain key personnel and the assumption of liabilities related to litigation or other legal proceedings involving the businesses in such transactions, as well as the failure to close planned transactions. Such transactions may require the company to secure financing and any significant disruption or turmoil in the capital markets could have an adverse effect on IBM's ability to access the capital markets at favorable terms. From time to time, the company disposes or attempts to dispose of assets that are no longer central to its strategic objectives. Any such disposition or attempted disposition is subject to risks, including risks related to the terms and timing of such disposition, risks related to obtaining necessary governmental or regulatory approvals and risks related to retained liabilities not subject to the company's control.

The Company's Financial Results for Particular Periods Are Difficult to Predict: IBM's revenues and profitability are affected by such factors as the introduction of new products and services, the ability to compete effectively in increasingly competitive marketplaces, the length of the sales cycles and the seasonality of technology purchases. In addition, certain of the company's growth areas involve new products, new customers, new and evolving competitors, and new markets, all of which contribute to the difficulty of predicting the company's financial results. The company's financial results may also be impacted by the structure of products and services contracts and the nature of its customers' businesses; for example, certain of the company's services contracts with commercial customers in regulated industries are subject to periodic review by regulators with respect to controls and processes. Further, general economic conditions, including sudden shifts in regional or global economic activity such as those associated with the COVID-19 pandemic may impact the company's financial results in any particular period. As a result of the above-mentioned factors, the company's financial results are difficult to predict. Historically, the company has had lower revenue in the first quarter than in the immediately preceding fourth quarter. In addition, the high volume of products typically ordered at the end of each quarter, especially at the end of the fourth quarter, make financial results for a given period difficult to predict.

Due to the Company's Global Presence, Its Business and Operations Could Be Impacted by Local Legal, Economic, Political, Health and Other Conditions, including the COVID-19 Pandemic: The company is a globally integrated entity, operating in over 175 countries worldwide and deriving more than fifty percent of its revenues from sales outside the United States. Changes in the laws or policies of the countries in which the company operates, or inadequate development or enforcement of such laws or policies, could affect the company's business and the company's overall results of operations. Further,

the company may be impacted directly or indirectly by the development and enforcement of laws and regulations in the U.S. and globally that are specifically targeted at the technology industry. The company's

results of operations also could be affected by economic and political changes in those countries and by macroeconomic changes, including recessions, inflation, currency fluctuations between the U.S. dollar and non-U.S. currencies and adverse changes in trade relationships amongst those countries. Further, as the company expands its customer base and the scope of its offerings, both within the U.S. and globally, it may be impacted by additional regulatory or other risks, including compliance with U.S. and foreign data privacy requirements, data localization requirements, labor relations laws, enforcement of IP protection laws, laws relating to anti-corruption, anti-competition regulations, and import, export and trade restrictions. Further, international trade disputes could create uncertainty. Tariffs and international trade sanctions resulting from these disputes could affect the company's ability to move goods and services across borders, or could impose added costs to those activities. Measures taken to date by the company to mitigate these impacts could be made less effective should trade sanctions or tariffs change. In addition, any widespread outbreak of an illness, pandemic or other local or global health issue, natural disasters, climate change impacts, or uncertain political climates, international hostilities, or any terrorist activities, could adversely affect customer demand, the company's operations and supply chain, and its ability to source and deliver products and services to its customers. For example, on March 11, 2020, the World Health Organization (WHO) declared the novel coronavirus (COVID-19) a global pandemic. The COVID-19 pandemic has created significant volatility, uncertainty and economic disruption. In the current macroeconomic environment, clients continue to balance short-term challenges and opportunities for transformation. Their short-term priorities continue to be focused on operational stability, flexibility and cash preservation, and as such, we may experience some disruptions in transactional performance. Additionally, clients' short-term priorities, as well as quarantines, limitations on travel and other factors associated with the COVID-19 pandemic may result in delays in some services projects. Another example, the U.K.'s withdrawal from the E.U., commonly referred to as "Brexit," has caused global economic, trade and regulatory uncertainty. The company is actively monitoring and planning for possible impacts from Brexit.

The Company May Not Meet Its Growth and Productivity Objectives under Its Internal Business Transformation and Global Integration Initiatives: On an ongoing basis, IBM seeks to drive greater agility, productivity, flexibility and cost savings by continuously transforming with the use of automation, artificial intelligence, agile processes and changes to the ways of working, while also enabling the scaling of resources, offerings and investments through the company's globally integrated model across both emerging and more established markets. These various initiatives may not yield their intended gains in speed, quality, productivity and enablement of rapid scaling, which may impact the company's competitiveness and its ability to meet its growth and productivity objectives.

Ineffective Internal Controls Could Impact the Company's Business and Operating Results: The company's internal control over financial reporting may not prevent or detect misstatements because of its inherent limitations, including the possibility of human error, the circumvention or overriding of controls, or fraud. Even effective internal controls can provide only reasonable assurance with respect to the preparation and fair presentation of financial statements. If the company fails to maintain the adequacy of its internal controls, including any failure to implement required new or improved controls, or if the company experiences difficulties in their implementation, the company's business and operating results could be harmed and the company could fail to meet its financial reporting obligations.

The Company's Use of Accounting Estimates Involves Judgment and Could Impact the Company's Financial Results: The application of accounting principles generally accepted in the U.S. (GAAP) requires the company to make estimates and assumptions about certain items and future events that directly affect its reported financial condition, including considering financial implications of the macroeconomic impacts of the COVID-19 pandemic. The company's most critical accounting estimates are described in the Management Discussion in IBM's 2020 Annual Report to Stockholders, under "Critical Accounting Estimates." In addition, as discussed in note R, "Commitments & Contingencies," in IBM's 2020 Annual Report to Stockholders, the company makes certain estimates including decisions related to legal proceedings and reserves. These estimates and assumptions involve the use of judgment. As a result, actual financial results may differ.

The Company's Goodwill or Amortizable Intangible Assets May Become Impaired: The company acquires other companies, including the intangible assets of those companies. The company may not realize all the economic benefit from those acquisitions, which could cause an impairment of goodwill or intangible assets. If our goodwill or net intangible assets become impaired, we may be required to record a charge to the Consolidated Income Statement.

[Table of Contents](#)

The Company Depends on Skilled Employees and Could Be Impacted by a Shortage of Critical Skills: Much of the future success of the company depends on the continued service, availability and integrity of skilled employees, including technical, marketing and staff resources. Skilled and experienced personnel in the areas where the company competes are in high demand, and competition for their talents is intense. Changing demographics and labor work force trends may result in a shortage of or insufficient knowledge and skills. In addition, as global opportunities and industry demand shifts, realignment, training and scaling of skilled resources may not be sufficiently rapid or successful. Further, many of IBM's key employees receive a total compensation package that includes equity awards. Any new regulations, volatility in the stock market and other factors could diminish the company's use or the value of the company's equity awards, putting the company at a competitive disadvantage.

The Company's Business Could Be Impacted by Its Relationships with Critical Suppliers: IBM's business employs a wide variety of components (hardware and software), supplies, services and raw materials from a substantial number of suppliers around the world. Certain of the company's businesses rely on a single or a limited number of suppliers, including for server processor technology for certain semiconductors. Changes in the business condition (financial or otherwise) of these suppliers could subject the company to losses and affect its ability to bring products to market. Further, the failure of the company's suppliers to deliver components, supplies, services and raw materials in sufficient quantities, in a timely manner, and in compliance with all applicable laws and regulations could adversely affect the company's business. In addition, any defective components, supplies or materials, or inadequate services received from suppliers could reduce the reliability of the company's products and services and harm the company's reputation.

Product and Service Quality Issues Could Impact the Company's Business and Operating Results: The company has rigorous quality control standards and processes intended to prevent, detect and correct errors, malfunctions and other defects in its products and services. If errors, malfunctions, defects or disruptions in service are experienced by customers or in the company's operations there could be negative consequences that could impact customers' business operations and harm the company's business's operating results.

The Company Could Be Impacted by Its Business with Government Clients: The company's customers include numerous governmental entities within and outside the U.S., including the U.S. Federal Government and state and local entities. Some of the company's agreements with these customers may be subject to periodic funding approval. Funding reductions or delays could adversely impact public sector demand for our products and services. Also, some agreements may contain provisions allowing the customer to terminate without cause and providing for higher liability limits for certain losses. In addition, the company could be suspended or debarred as a governmental contractor and could incur civil and criminal fines and penalties, which could negatively impact the company's results of operations, financial results and reputation.

The Company's Reliance on Third Party Distribution Channels and Ecosystems Could Impact Its Business: The company offers its products directly and through a variety of third party distributors, resellers and ecosystem partners. Changes in the business condition (financial or otherwise) of these distributors, resellers and ecosystem partners could subject the company to losses and affect its ability to bring its products to market. As the company moves into new areas, distributors, resellers and ecosystem partners may be unable to keep up with changes in technology and offerings, and the company may be unable to recruit and enable appropriate partners to achieve growth objectives. In addition, the failure of third party distributors, resellers and ecosystem partners to comply with all applicable laws and regulations may prevent the company from working with them and could subject the company to losses and affect its ability to bring products to market.

Risks Related to Cybersecurity and Data Privacy

Cybersecurity and Privacy Considerations Could Impact the Company's Business: There are numerous and evolving risks to cybersecurity and privacy, including risks originating from intentional acts of criminal hackers, hacktivists, nation states and competitors; from intentional and unintentional acts of customers, contractors, business partners, vendors, employees and other third parties; and from errors in processes or technologies, as well as the risks associated with an increase in the number of customers, contractors, business partners, vendors, employees and other third parties working remotely as a result of the COVID-19 pandemic. Computer hackers and others routinely attack the security of

technology products, services, systems and networks using a wide variety of methods, including ransomware

[Table of Contents](#)

or other malicious software and attempts to exploit vulnerabilities in hardware, software, and infrastructure. Attacks also include social engineering to fraudulently induce customers, contractors, business partners, vendors, employees and other third parties to disclose information, transfer funds, or unwittingly provide access to systems or data. The company is at risk of security breaches not only of our own products, services, systems and networks, but also those of customers, contractors, business partners, vendors, employees and other third parties. Cyber threats are continually evolving, making it difficult to defend against such threats and vulnerabilities that can persist undetected over extended periods of time. The company's products, services, systems and networks, including cloud-based systems and systems and technologies that the company maintains on behalf of its customers, are used in critical company, customer or third-party operations, and involve the storage, processing and transmission of sensitive data, including valuable intellectual property, other proprietary or confidential data, regulated data, and personal information of employees, customers and others. These products, services, systems and networks are also used by customers in heavily regulated industries, including those in the financial services, healthcare, critical infrastructure and government sectors. Successful cybersecurity attacks or other security incidents could result in, for example, one or more of the following: unauthorized access to, disclosure, modification, misuse, loss, or destruction of company, customer, or other third party data or systems; theft or import or export of sensitive, regulated, or confidential data including personal information and intellectual property, including key innovations in artificial intelligence, blockchain, IoT, quantum, or other disruptive technologies; the loss of access to critical data or systems through ransomware, crypto mining, destructive attacks or other means; and business delays, service or system disruptions or denials of service. In the event of such actions, the company, its customers and other third parties could be exposed to liability, litigation, and regulatory or other government action, as well as the loss of existing or potential customers, damage to brand and reputation, damage to our competitive position, and other financial loss. In addition, the cost and operational consequences of responding to cybersecurity incidents and implementing remediation measures could be significant. In the company's industry, security vulnerabilities are increasingly discovered, publicized and exploited across a broad range of hardware, software or other infrastructure, elevating the risk of attacks and the potential cost of response and remediation for the company and its customers. In addition, the fast-paced, evolving, pervasive, and sophisticated nature of certain cyber threats and vulnerabilities, as well as the scale and complexity of the business and infrastructure, make it possible that certain threats or vulnerabilities will be undetected or unmitigated in time to prevent or minimize the impact of an attack on the company or its customers. Cybersecurity risk to the company and its customers also depends on factors such as the actions, practices and investments of customers, contractors, business partners, vendors and other third parties. Cyber attacks or other catastrophic events resulting in disruptions to or failures in power, information technology, communication systems or other critical infrastructure could result in interruptions or delays to company, customer, or other third party operations or services, financial loss, injury or death to persons or property, potential liability, and damage to brand and reputation. Although the company continuously takes significant steps to mitigate cybersecurity risk across a range of functions, such measures can never eliminate the risk entirely or provide absolute security. To date, while the company continues to monitor for, identify, investigate, respond to and remediate cybersecurity incidents, there have not been cybersecurity incidents that have had a material adverse effect on the company, though there is no assurance that there will not be cybersecurity incidents that will have a material adverse effect in the future.

As a global enterprise, the regulatory environment with regard to cybersecurity, privacy and data protection issues is increasingly complex and will continue to impact the company's business, including through increased risk, increased costs, and expanded or otherwise altered compliance obligations, including with respect to the increased regulatory activity around the security of critical infrastructure, IoT devices, and various customer and government supply chain security programs. As the company's reliance on data grows, the potential impact of regulations on the company's business, risks, and reputation will grow accordingly. The enactment and expansion of data protection and privacy laws and regulations around the globe, including an increased focus on international data transfer mechanisms driven by the European Court of Justice decision in the Schrems II matter; the lack of harmonization of such laws and regulations; the increase in associated litigation and enforcement activity; the potential for damages, fines and penalties; and the potential regulation of new and emerging technologies such as artificial intelligence will continue to result in increased compliance costs and risks. Any additional costs and penalties associated with increased compliance, enforcement, and risk reduction could make certain offerings less profitable or increase the difficulty of bringing certain offerings to market.

Risks Related to Laws and Regulations

The Company Could Incur Substantial Costs for Environmental Matters: The company is subject to various federal, state, local and foreign laws and regulations concerning the discharge of materials into the environment or otherwise related to environmental protection, including the U.S. Superfund law. The company could incur substantial costs, including cleanup costs, fines and civil or criminal sanctions, as well as third-party claims for property damage or personal injury, if it were to violate or become liable under environmental laws and regulations. Compliance with environmental laws and regulations is not expected to have a material adverse effect on the company's financial position, results of operations and competitive position.

Tax Matters Could Impact the Company's Results of Operations and Financial Condition: The company is subject to income taxes in both the United States and numerous foreign jurisdictions. IBM's provision for income taxes and cash tax liability in the future could be adversely affected by numerous factors including, but not limited to, income before taxes being lower than anticipated in countries with lower statutory tax rates and higher than anticipated in countries with higher statutory tax rates, changes in the valuation of deferred tax assets and liabilities, and changes in tax laws, regulations, accounting principles or interpretations thereof, which could adversely impact the company's results of operations and financial condition in future periods. The Organization for Economic Cooperation and Development (OECD) is issuing guidelines that are different, in some respects, than long-standing international tax principles. As countries unilaterally amend their tax laws to adopt certain parts of the OECD guidelines, this may increase tax uncertainty and may adversely impact the company's income taxes. Local country, state, provincial or municipal taxation may also be subject to review and potential override by regional, federal, national or similar forms of government. In addition, IBM is subject to the continuous examination of its income tax returns by the United States Internal Revenue Service and other tax authorities around the world. The company regularly assesses the likelihood of adverse outcomes resulting from these examinations to determine the adequacy of its provision for income taxes. There can be no assurance that the outcomes from these examinations will not have an adverse effect on the company's provision for income taxes and cash tax liability.

The Company Is Subject to Legal Proceedings and Investigatory Risks: As a company with a substantial employee population and with clients in more than 175 countries, IBM is or may become involved as a party and/or may be subject to a variety of claims, demands, suits, investigations, tax matters and other proceedings that arise from time to time in the ordinary course of its business. The risks associated with such legal proceedings are described in more detail in note R, "Commitments & Contingencies," in IBM's 2020 Annual Report to Stockholders. The company believes it has adopted appropriate risk management and compliance programs. Legal and compliance risks, however, will continue to exist and additional legal proceedings and other contingencies, the outcome of which cannot be predicted with certainty, may arise from time to time.

Risks Related to Financing and Capital Markets Activities

The Company's Results of Operations and Financial Condition Could Be Negatively Impacted by Its U.S. and non-U.S. Pension Plans: Adverse financial market conditions and volatility in the credit markets may have an unfavorable impact on the value of the company's pension trust assets and its future estimated pension liabilities. As a result, the company's financial results in any period could be negatively impacted. In addition, in a period of an extended financial market downturn, the company could be required to provide incremental pension plan funding with resulting liquidity risk which could negatively impact the company's financial flexibility. Further, the company's results could be negatively impacted by premiums for mandatory pension insolvency insurance coverage outside the United States. Premium increases could be significant due to the level of insolvencies of unrelated companies in the country at issue. IBM's 2020 Annual Report to Stockholders includes information about potential impacts from pension funding and the use of certain assumptions regarding pension matters.

The Company Is Exposed to Currency and Financing Risks That Could Impact Its Revenue and Business: The company derives a significant percentage of its revenues and costs from its affiliates operating in local currency environments, and those results are affected by changes in the relative values of non-U.S. currencies and the U.S. dollar, as well as sudden shifts in regional or global economic activity such as those associated with the COVID-19 pandemic. Further, inherent in the company's financing business are risks related to the concentration of credit, client

[Table of Contents](#)

creditworthiness, interest rate and currency fluctuations on the associated debt and liabilities, the determination of residual values and the financing of assets other than traditional IT assets. The company employs a number of strategies to manage these risks, including the use of derivative financial instruments, which involve the risk of non-performance by the counterparty. In addition, there can be no assurance that the company's efforts to manage its currency and financing risks will be successful.

The Company's Financial Performance Could Be Impacted by Changes in Market Liquidity Conditions and by Customer Credit Risk on Receivables: The company's financial performance is exposed to a wide variety of industry sector dynamics worldwide, including sudden shifts in regional or global economic activity such as those associated with the COVID-19 pandemic. The company's earnings and cash flows, as well as its access to funding, could be negatively impacted by changes in market liquidity conditions. IBM's 2020 Annual Report to Stockholders includes information about the company's liquidity position. The company's client base includes many enterprises worldwide, from small and medium businesses to the world's largest organizations and governments, with a significant portion of the company's revenue coming from global clients across many sectors. Most of the company's sales are on an open credit basis, and the company performs ongoing credit evaluations of its clients' financial conditions. If the company becomes aware of information related to the creditworthiness of a major customer, or if future actual default rates on receivables in general differ from those currently anticipated, the company may have to adjust its allowance for credit losses, which could affect the company's consolidated net income in the period the adjustments are made.

Risks Related to Ownership of IBM Securities

Risk Factors Related to IBM Securities: The company and its subsidiaries issue debt securities in the worldwide capital markets from time to time, with a variety of different maturities and in different currencies. The value of the company's debt securities fluctuates based on many factors, including the methods employed for calculating principal and interest, the maturity of the securities, the aggregate principal amount of securities outstanding, the redemption features for the securities, the level, direction and volatility of interest rates, changes in exchange rates, exchange controls, governmental and stock exchange regulations and other factors over which the company has little or no control. The company's ability to pay interest and repay the principal for its debt securities is dependent upon its ability to manage its business operations, as well as the other risks described under this Item 1A. entitled "Risk Factors." There can be no assurance that the company will be able to manage any of these risks successfully.

The company also issues its common stock from time to time in connection with various compensation plans, contributions to its pension plan and certain acquisitions. The market price of IBM common stock is subject to significant volatility, due to other factors described under this Item 1A. entitled "Risk Factors," as well as economic and geopolitical conditions generally, trading volumes, speculation by the press or investment community about the company's financial condition, and other factors, many of which are beyond the company's control. Since the market price of IBM's common stock fluctuates significantly, stockholders may not be able to sell the company's stock at attractive prices.

In addition, changes by any rating agency to the company's outlook or credit ratings can negatively impact the value and liquidity of both the company's debt and equity securities. The company does not make a market in either its debt or equity securities and cannot provide any assurances with respect to the liquidity or value of such securities.

Item 1B. Unresolved Staff Comments:

Not applicable.

Item 2. Properties:

IBM's corporate headquarters are located at an owned site in Armonk, New York. As of December 31, 2020, in aggregate, we owned or leased facilities for current use consisting of approximately 73 million square feet worldwide.

At December 31, 2020, IBM's facilities in the U.S. had aggregate floor space of approximately 25 million square feet, of which approximately 12 million was owned and 13 million was leased. Outside

the U.S., facilities totaled nearly

48 million square feet, of which 10 million was owned and 38 million was leased. This space is primarily used for sales and distribution, manufacturing and development, data processing services including the company's cloud centers, research and other administrative and general support purposes. Our facilities are utilized for current operations of all business segments.

Continuous maintenance and upgrading of facilities are essential to maintain technological leadership, improve productivity and meet customer demand. We believe that in all material respects our properties have been satisfactorily maintained, are in good condition and are suitable for our operations.

Item 3. Legal Proceedings:

Refer to note R, "Commitments & Contingencies," on pages 118 to 120 of IBM's 2020 Annual Report to Stockholders, which is incorporated herein by reference.

Item 4. Mine Safety Disclosures:

Not applicable.

PART II**Item 5. Market for the Registrant's Common Equity, Related Stockholder Matters and Issuer Purchases of Equity Securities:**

Refer to page 142 of IBM's 2020 Annual Report to Stockholders, which is incorporated herein by reference solely as it relates to this item.

IBM common stock is listed on the New York Stock Exchange and the NYSE Chicago under the symbol "IBM." There were 373,649 common stockholders of record at February 10, 2021.

The following table provides information relating to the company's repurchase of common stock for the fourth quarter of 2020.

	Total Number of Shares Purchased	Average Price Paid per Share	Total Number of Shares Purchased as Part of Publicly Announced Program	Approximate Dollar Value of Shares that May Yet Be Purchased Under the Program*
October 1, 2020— October 31, 2020	—	\$ —	—	\$2,007,611,768
November 1, 2020— November 30, 2020	—	\$ —	—	\$2,007,611,768
December 1, 2020— December 31, 2020	—	\$ —	—	\$2,007,611,768
Total	—	\$ —	—	

* On October 30, 2018, the Board of Directors authorized \$4.0 billion in funds for use in the company's common stock repurchase program. The company stated that it would repurchase shares on the open market or in private transactions depending on market conditions. The common stock repurchase program does not have an expiration date. This table does not include shares tendered to satisfy the exercise price in connection with cashless exercises of employee stock options or shares tendered to satisfy tax withholding obligations in connection with employee equity awards.

The company suspended its share repurchase program at the time of the Red Hat closing in mid-2019. At December 31, 2020 there was approximately \$2.0 billion in authorized funds remaining for purchases under this program.

Item 6. Selected Financial Data:

We have early adopted the recent amendment to Regulation S-K Item 301, which eliminates Selected Financial Data.

Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations:

Refer to pages 18 through 64 of IBM's 2020 Annual Report to Stockholders, which are incorporated herein by reference.

Item 7A. Quantitative and Qualitative Disclosures About Market Risk:

Refer to the section titled "Market Risk" on pages 63 and 64 of IBM's 2020 Annual Report to Stockholders, which is incorporated herein by reference.

Item 8. Financial Statements and Supplementary Data:

Refer to pages 68 through 140 of IBM's 2020 Annual Report to Stockholders, which are incorporated herein by reference. Also refer to the Financial Statement Schedule on page S-1 of this Form 10-K. We have early adopted the recent amendment to Regulation S-K Item 302, which replaces the current requirement for quarterly tabular disclosure with a principles-based requirement for material retrospective changes.

Item 9. Changes in and Disagreements with Accountants on Accounting and Financial Disclosure:

Not applicable.

Item 9A. Controls and Procedures:

The company's management evaluated, with the participation of the Chief Executive Officer and Chief Financial Officer, the effectiveness of the company's disclosure controls and procedures as of the end of the period covered by this report. Based on that evaluation, the Chief Executive Officer and Chief Financial Officer have concluded that the company's disclosure controls and procedures were effective as of the end of the period covered by this report.

Refer to "Report of Management" and "Report of Independent Registered Public Accounting Firm" on pages 65 to 67 of IBM's 2020 Annual Report to Stockholders, which are incorporated herein by reference. There has been no change in the company's internal control over financial reporting that occurred during the fourth fiscal quarter that has materially affected, or is reasonably likely to materially affect, the company's internal control over financial reporting.

Item 9B. Other Information:

Due to retirement, Sidney Taurel will not stand for re-election at the company's annual meeting of stockholders on April 27, 2021. As a result, Article III, Section 2 of the company's By-Laws was amended to decrease the number of directors to twelve, effective April 27, 2021. The full text of IBM's By-Laws, as amended effective April 27, 2021, is included as Exhibit 3.2 to this report.

PART III

Item 10. Directors, Executive Officers and Corporate Governance:

Refer to the information under the captions “Election of Directors for a Term of One Year,” “Governance and Board—Committees of the Board,” “Governance and Board—Section 16(a) Beneficial Ownership Reporting Compliance,” “Governance and Board—Corporate Governance” and “Frequently Asked Questions—How do I submit an item of business for the 2022 annual meeting?” in IBM’s definitive Proxy Statement to be filed with the SEC and delivered to stockholders in connection with the Annual Meeting of Stockholders to be held April 27, 2021, all of which information is incorporated herein by reference. Also refer to Item 1 of this Form 10-K under the caption “Executive Officers of the Registrant (at February 23, 2021)” on page 3 for additional information on the company’s executive officers.

Item 11. Executive Compensation:

Refer to the information under the captions “2020 Summary Compensation Table and Related Narrative,” “2020 Summary Compensation Table,” “2020 Compensation Discussion and Analysis,” “2020 Grants of Plan-Based Awards Table,” “2020 Outstanding Equity Awards at Fiscal Year-End Table,” “2020 Option Exercises and Stock Vested Table,” “2020 Retention Plan Table,” “2020 Pension Benefits Narrative,” “2020 Pension Benefits Table,” “2020 Nonqualified Deferred Compensation Narrative,” “2020 Nonqualified Deferred Compensation Table,” “2020 Potential Payments Upon Termination Narrative,” “2020 Potential Payments Upon Termination Table,” “Governance and Board—Compensation Committee Interlocks and Insider Participation: None,” “Compensation Program as It Relates to Risk,” “2020 Executive Compensation—Report of the Executive Compensation and Management Resources Committee of the Board of Directors,” and “Pay Ratio” in IBM’s definitive Proxy Statement to be filed with the SEC and delivered to stockholders in connection with the Annual Meeting of Stockholders to be held April 27, 2021, all of which information is incorporated herein by reference.

Item 12. Security Ownership of Certain Beneficial Owners and Management and Related Stockholder Matters:

Refer to the information under the captions “Ownership of Securities—Security Ownership of Certain Beneficial Owners” and “Ownership of Securities—Common Stock and Stock-Based Holdings of Directors and Executive Officers” in IBM’s definitive Proxy Statement to be filed with the SEC and delivered to stockholders in connection with the Annual Meeting of Stockholders to be held April 27, 2021, all of which information is incorporated herein by reference.

EQUITY COMPENSATION PLAN INFORMATION

Plan Category	Number of securities to be issued upon exercise of outstanding options, warrants and rights(1) (a)	Weighted-average exercise price of outstanding options, warrants and rights(1) (b)	Number of securities remaining available for future issuance under equity compensation plans (excluding securities reflected in column(a)) (c)
Equity compensation plans approved by security holders			
Options	1,500,000	\$ 139.83	—
RSUs	16,270,098	N/A	—
PSUs	5,824,730 (2)	N/A	—
Subtotal	23,594,828	\$ 139.83	67,949,557
Equity compensation plans not approved by security holders			
Options	—	\$ —	—
RSUs	626,606	N/A	—
PSUs	212,820 (2)	N/A	—
DCEAP shares	180,248	N/A	—
Subtotal	1,019,673	\$ —	34,786,258
Total	24,614,502	\$ 139.83	102,735,815

N/A is not applicable

RSUs = Restricted Stock Units, including Retention Restricted Stock Units

PSUs = Performance Share Units

DCEAP Shares = Promised Fee Shares under the DCEAP (see plan description below)

- (1) In connection with 19 acquisition transactions, 83,839 additional share based awards, consisting of stock options, were outstanding at December 31, 2020 as a result of the Company's assumption of awards granted by the acquired entities. The weighted-average exercise price of these awards was \$43.88. The Company has not made, and will not make, any further grants or awards of equity securities under the plans of these acquired companies.
- (2) The numbers included for PSUs in column (a) above reflect the maximum number payout. Assuming target number payout, the number of securities to be issued upon exercise of PSUs for equity compensation plans approved by security holders is 3,426,312 and for equity compensation plans not approved by security holders is 125,188. For additional information about PSUs, including payout calculations, refer to the information under "2020 Summary Compensation Table Narrative" in IBM's definitive Proxy Statement to be filed with the Securities and Exchange Commission and delivered to stockholders in connection with the Annual Meeting of Stockholders to be held April 27, 2021.

The material features of each equity compensation plan under which equity securities are authorized for issuance that was adopted without stockholder approval are described below:

2001 Long-Term Performance Plan (the "2001 Plan")

The 2001 Plan has been used to fund awards for employees other than senior executives of the Company. Awards for senior executives of the Company have been and will continue to be funded from the stockholder-approved 1999 Long-Term Performance Plan (the "1999 Plan"); the 1999 Plan is also used to fund awards for employees other than senior executives, otherwise, the provisions of the 2001 Plan are identical to the 1999 Plan, including the type of awards that may be granted under the plan (stock options, restricted stock and unit awards and long-term performance incentive awards).

The 2001 Plan is administered by the Executive Compensation and Management Resources Committee of the Board of Directors (the “Committee”), and that Committee may delegate to officers of the company certain of its duties, powers and authority. Payment of awards may be made in the form of cash, stock or combinations thereof and may be deferred with Committee approval. Awards are not transferable or assignable except (i) by law, will or the laws of descent and distribution, (ii) as a result of the disability of the recipient, or (iii) with the approval of the Committee.

If the employment of a participant terminates, other than as a result of the death or disability of a participant, all unexercised, deferred and unpaid awards shall be canceled immediately, unless the award agreement provides otherwise. In the event of the death of a participant or in the event a participant is deemed by the company to be disabled and eligible for benefits under the terms of the IBM Long-Term Disability Plan (or any successor plan or similar plan of another employer), the participant’s estate, beneficiaries or representative, as the case may be, shall have the rights and duties of the participant under the applicable award agreement. In addition, unless the award agreement specifies otherwise, the Committee may cancel, rescind, suspend, withhold or otherwise limit or restrict any unexpired, unpaid, or deferred award at any time if the participant is not in compliance with all applicable provisions of the awards agreement and the 2001 Plan. In addition, awards may be cancelled if the participant engages in any conduct or act determined to be injurious, detrimental or prejudicial to any interest of the company.

PWCC Acquisition Long-Term Performance Plan (the “PWCC Plan”)

The PWCC Plan was adopted by the Board of Directors in connection with the company’s acquisition of PricewaterhouseCoopers Consulting (“PwCC”) from PricewaterhouseCoopers LLP, as announced on October 1, 2002. The PWCC Plan has been and will continue to be used solely to fund awards for employees of PwCC who have become employed by the company as a result of the acquisition. Awards for senior executives of the company will not be funded from the PWCC Plan. The terms and conditions of the PWCC Plan are substantively identical to the terms and conditions of the 2001 Plan, described above.

IBM Red Hat Acquisition Long-Term Performance Plan (the “Red Hat Plan”)

The Red Hat Plan was adopted by the Board of Directors in connection with the company’s acquisition of Red Hat, Inc. on July 9, 2019. The Red Hat Plan has been and will continue to be used solely to fund awards for employees who were not employed by IBM immediately prior to the closing of the acquisition. Awards for senior executives of the company will not be funded from the Red Hat Plan. The terms and conditions of the Red Hat Plan are substantively identical to the terms and conditions of the 2001 Plan, described above.

Amended and Restated Deferred Compensation and Equity Award Plan (the “DCEAP”)

The DCEAP was adopted in 1993 and amended and restated effective January 1, 2014. Under the Amended and Restated DCEAP, non-management directors receive Promised Fee Shares in connection with deferred annual retainer payments. Each Promised Fee Share is equal in value to one share of the company’s common stock. Upon a director’s retirement or other completion of service as a director, amounts deferred into Promised Fee Shares are payable in either cash and/or shares of the company’s stock either as lump sum or installments pursuant to the director’s distribution election. For additional information about the DCEAP, see “2020 Director Compensation Narrative” in IBM’s definitive Proxy Statement to be filed with the Securities and Exchange Commission and delivered to stockholders in connection with the Annual Meeting of Stockholders to be held April 27, 2021.

Item 13. Certain Relationships and Related Transactions, and Director Independence:

Refer to the information under the captions “IBM Board of Directors,” “Governance and Board—Committees of the Board” and “Governance and Board—Certain Transactions and Relationships” in IBM’s definitive Proxy Statement to be filed with the SEC and delivered to stockholders in connection with the Annual Meeting of Stockholders to be held April 27, 2021, all of which information is incorporated herein by reference.

Item 14. Principal Accounting Fees and Services:

Refer to the information under the captions “Report of the Audit Committee of the Board of Directors” and “Audit and Non-Audit Fees” in IBM’s definitive Proxy Statement to be filed with the SEC and delivered to stockholders in connection with the Annual Meeting of Stockholders to be held April 27, 2021, all of which information is incorporated herein by reference.

PART IV

Item 15. Exhibits, Financial Statement Schedules:

(a) The following documents are filed as part of this report:

1. Financial statements from IBM's 2020 Annual Report to Stockholders, which are incorporated herein by reference:
 Report of Independent Registered Public Accounting Firm (page 66 and 67).
 Consolidated Income Statement for the years ended December 31, 2020, 2019 and 2018 (page 68).
 Consolidated Statement of Comprehensive Income for the years ended December 31, 2020, 2019 and 2018 (page 69).
 Consolidated Balance Sheet at December 31, 2020 and 2019 (page 70).
 Consolidated Statement of Cash Flows for the years ended December 31, 2020, 2019 and 2018 (page 71).
 Consolidated Statement of Equity at December 31, 2020, 2019 and 2018 (pages 72 and 73).
 Notes to Consolidated Financial Statements (pages 74 through 140).
2. Financial statement schedule required to be filed by Item 8 of this Form:

Page	Schedule Number	
		Report of Independent Registered Public Accounting Firm on Financial Statement Schedule.
S-1	II	Valuation and Qualifying Accounts and Reserves for the years ended December 31, 2020, 2019 and 2018.

All other schedules are omitted as the required matter is not present, the amounts are not significant or the information is shown in the Consolidated Financial Statements or the notes thereto.

3. Exhibits:

Reference Number per Item 601 of Regulation S-K	Description of Exhibits	Exhibit Number in this Form 10-K
(3)	Certificate of Incorporation and By-laws. The Certificate of Incorporation of IBM is Exhibit 3.2 to Form 8-K filed April 27, 2007, and is hereby incorporated by reference. The By-Laws of IBM, as amended through January 1, 2021, is Exhibit 3.2 to Form 8-K, filed December 18, 2020, and is hereby incorporated by reference. The By-Laws of IBM, as amended effective April 27, 2021.	3.2
(4)	Instruments defining the rights of security holders. The instruments defining the rights of the holders of the 7.00% Debentures due 2025 and the 7.00% Debentures due 2045 are Exhibits 2 and 3, respectively, to Form 8-K, filed on October 30, 1995, and are hereby incorporated by reference. The instrument defining the rights of the holders of the 7.125% Debentures due 2096 is Exhibit 4.2 to Form 8-K/A, filed on December 6, 1996, and is hereby incorporated by reference.

**REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM
ON FINANCIAL STATEMENT SCHEDULE**

To the Board of Directors and Stockholders of
International Business Machines Corporation:

Our audits of the consolidated financial statements referred to in our report dated February 23, 2021 appearing in the 2020 Annual Report to Stockholders of International Business Machines Corporation (which report and consolidated financial statements are incorporated by reference in this Annual Report on Form 10-K) also included an audit of the financial statement schedule listed in Item 15(a)(2) of this Form 10-K. In our opinion, this financial statement schedule presents fairly, in all material respects, the information set forth therein when read in conjunction with the related consolidated financial statements.

2018	\$ 451	\$ 897	\$ (828)	\$ (20)	\$ 500

* Opening balance does not equal the allowance at December 31, 2019 due to the adoption of the guidance for current expected credit losses.

Additions/(Deductions) to the allowances represent changes in estimates of unrecoverable amounts in receivables and inventory and are recorded to expense and cost accounts, respectively. Amounts are written-off when they are deemed unrecoverable by the company. Additions/(Deductions) to Revenue Based Provisions represent changes in estimated reductions to revenue, primarily as a result of revenue-related programs, including customer and business partner rebates. Write-offs for Revenue Based Provisions represent reductions in the provision due to amounts remitted to customers and business partners. Other primarily comprises currency translation adjustments.
